JET COMBAT SIMULATOR™

Climb into the cockpit of America's fastest jet fighter, the McDonnell Douglas F-15 Eagle. Learn to fly the way real jet pilots do, with a sophisticated, computerized flight simulator that recreates the actual aerodynamic characteristics of the real thing.

Practice landing in crosswinds or tracking enemy aircraft at 20,000 feet. Learn to use the latest in onboard avionics—navigational radar for tracking your position, an instrument landing system for coming in under adverse conditions, a flight computer to display your ground position and help locate enemy aircraft.

You decide whether to defend your bases against the enemy's inexperienced trainee pilots or their best aces. Just remember, if you choose the latter, be ready for some fancy maneuvers when you engage them in a high altitude dogfight.

With Jet Combat Simulator you'll feel like you're right in the pilot's seat. Zip up your flight-suit and pull on your helmet...we'll see you at 30,000 feet!

- **Features Realistic Flight and Combat Simulation**
- **Includes Take-Offs, Landings, and Aerial Dogfights**
- **Choose Between Practice or Combat Modes**
- **Select from Four Levels of Difficulty**
- **One Player, Joystick Optional**

EPYX CODING To help you choose the game that's right for you, EPYX games are coded to indicate the degree of emphasis on "Action," "Strategy," or "Learning." These symbols will appear on the front of all EPYX packages.
